

In-fill Panels

STAIR
SYSTEMS

Offerings

- Woven or Welded Wire Mesh
- Your Choice of Wire Mesh Patterns
- Cut to Your Panel Dimensions
- Choice of Welding Pattern & Finish
- Your Choice of Mesh Finish

(Carbon Steel, Stainless Steel, or Primer Painted Red)

Stair Components & Systems manufactures custom infill panels to exactly meet the requirements of our customers. Mesh for in-fill panels is available in a nearly infinite variety of styles and patterns. Two of the most common types are welded and woven wire. Patterns range from square and diamond-shaped openings to more intricate, architectural styles.

Our hems for standard infill panels are manufactured using a minimum of 14 gauge material. Since there are so many u-edging hem options for in-fill panels, we provide hemmed panels based on customer designs. We offer two options for purchase: fully manufactured panels with hems pre-welded and ready to install, or as separate components, ready for welding.
